

PRIMER PROGRAMA EN TERRAFORM

Primero preparé la herramienta para que pudiera usar un proveedor que genera valores aleatorios, después revisé que mi archivo estuviera bien escrito y Terraform confirmó que todo estaba correcto. Luego pedí que me mostrara qué iba a hacer y me indicó que iba a crear un recurso nuevo, en este caso un texto aleatorio. Finalmente acepté la ejecución y Terraform generó una cadena con 16 caracteres.

```
Initializing provider plugins...
- Finding hashicorp/random versions matching "~> 3.0".
..
- Installing hashicorp/random v3.9.1...
- Installed hashicorp/random v3.9.1 (signed by HashiCorp)

Terraform has created a lock file .terraform.lock.hcl
to record the provider
selections it made above. Include this file in your version control repository
so that Terraform can guarantee to make the same selections by default when
you run "terraform init" in the future.

Terraform has been successfully initialized!

You may now begin working with Terraform. Try running
"terraform plan" to see
any changes that are required for your infrastructure.
All Terraform commands
should now work.

If you ever set or change modules or backend configuration for Terraform,
rerun this command to reinitialize your working directory. If you forget, other
commands will detect it and remind you to do so if necessary.
PS C:\Workspace\terraform\utvt\lab1>
```

Problems Output Debug Console **Terminal** Ports SonarQube

- PS C:\Workspace\terraform\utvt\lab1> terraform validate
Success! The configuration is valid.

- PS C:\Workspace\terraform\utvt\lab1> terraform plan

Terraform used the selected providers to generate the following execution plan. Resource actions are indicated with the following symbols:

+ create

Terraform will perform the following actions:

```
# random_string.suffix will be created
+ resource "random_string" "suffix" {
  + id          = (known after apply)
  + length      = 16
  + lower       = true
  + min_lower   = 0
  + min_numeric = 0
  + min_special = 0
  + min_upper   = 0
  + number      = true
  + numeric     = true
  + result      = (known after apply)
  + special     = true
  + upper       = true
}
```

Plan: 1 to add, 0 to change, 0 to destroy.

Apply cancelled.

● PS C:\Workspace\terraform\utvt\lab1> terraform apply

Terraform used the selected providers to generate the following execution plan. Resource actions are indicated with the following symbols:

+ create

Terraform will perform the following actions:

```
# random_string.suffix will be created
+ resource "random_string" "suffix" {
  + id          = (known after apply)
  + length      = 16
  + lower       = true
  + min_lower   = 0
  + min_numeric = 0
  + min_special = 0
  + min_upper   = 0
  + number      = true
  + numeric     = true
  + result      = (known after apply)
  + special     = true
  + upper       = true
}
```

Plan: 1 to add, 0 to change, 0 to destroy.

Do you want to perform these actions?

Terraform will perform the actions described above.

Enter a value: yes

random_string.suffix: Creating...

random_string.suffix: Creation complete after 0s [id=2]N3H]lrlWRq2@M0]

Apply complete! Resources: 1 added, 0 changed, 0 destroyed.
